THE EXCEPTION TO THE RULE

AS A RULE PCs ARE USED FOR ONE THING AT A TIME

The AT&T PC 6300 PLUS with

SIMUL-TASK

THE EXCEPTION TO THE RULE

- RULE:** Most PCs are used for one thing at a time.
EXCEPTION: **SIMUL-TASK** true multi-tasking capability and **SIMUL-TASK** background communications.
- RULE:** Off the shelf MS[™]-DOS software means "off the shelf."
EXCEPTION: **SIMUL-TASK** easy program customization.
- RULE:** With most PCs, you cannot schedule a program to run while you are not there.
EXCEPTION: **SIMUL-TASK** unattended program scheduling.
- RULE:** Most MS-DOS PCs do not have password security.
EXCEPTION: **SIMUL-TASK** password and file security.
- RULE:** On most PCs, moving between applications and operating systems is tedious and time-consuming.
EXCEPTION: **SIMUL-TASK** easy "Office" interface.
- RULE:** Most MS-DOS PCs are just clones.
EXCEPTION: The AT&T PC 6300 PLUS -- One of PC WEEK'S "Most Significant Products of 1985."
