Personal Computer Interactive Executive
General Information Manual

The Personal Computer Interactive Executive is a purpose operating system for the IBM PC. It provides a command language, device independent file system, development tools, and a menu-driven interface for performing complex tasks by connecting, in a simple and direct manner, to the computer's resources.

Personal
Computer
Software

**Personal Computer
Interactive Executive**—derived from UNIX* System III—provides productivity tools for program development, document preparation and text processing using the IBM Personal Computer.

*UNIX is a trademark of AT&T Bell Laboratories

Fourth Edition (October 1984)

This edition applies to Release 1, Modification Level 1 of the program product Personal Computer Interactive Executive (1753369), and to all subsequent releases and modifications until otherwise indicated in new editions or Technical Newsletters. Changes are made periodically to the information herein; these changes will be incorporated in new editions of this publication.

References in this publication to IBM products, programs, or services do not imply that IBM intends to make these available outside the United States.

Products are not stocked at the address given below. Requests for copies of this product and for technical information about this product should be directed to your IBM marketing representative or an authorized IBM Personal Computer dealer.

A Reader's Comment Form has been provided at the back of this publication. If this form has been removed, address comments to: IBM Corporation, IPS Product Support Center, Dept. 6TM, P.O. Box 152560, Irving, Texas 75015-2560.

IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.
